

Help Itchy put the hearts in order from largest to smallest!

Instructions to teacher: (choose one or do both)

1. Give each child a strip of construction paper or cardstock 45 cm (16 in) long and 13 cm (5 in) high. Have children cut out the hearts, glue them onto the strip in order, then color the hearts in a 2 color pattern.
2. Color all the hearts, cut them out and put them in order. Start with the largest heart and glue each smaller heart on top to form a single colorful heart with concentric layers.
